

OVERSHARE

CONCEPT IN DETAILS

Premise

Overshare stages the human need for intimacy and the social pressure to expose oneself in today's hyperconnected world. Body and camera intertwine in real time: a dancer and a visual artist transform each gesture and choice into images, using performance and image to question the nature of identity. Which self is the real one? Where is the threshold, if there is one? The stage becomes a site of magnifying glass, where this tension becomes visible.

The work speaks to an audience that lives this tension every day: people who find themselves performing their lives online while feeling increasingly estranged from their private reality. Rather than offering definitive answers, the piece seeks to create a sense of recognition.

Concept

The word "share" comes from the Old English *scearu*, meaning "to cut." Originally, it referred to the division of something real and concrete so that it could be given to someone else. In Latin, *cumdividere* means "to divide with." Sharing therefore implied a renunciation for the common good, a quiet act of generosity intended to help someone in need.
In the 19th century, the meaning began to turn inward. Sharing feelings, emotions, and personal stories became a way of releasing an inner weight, lightening the self through confession. This emotional shift paved the way for the meaning the word carries today. With the rise of digital culture, what began as a tangible act of division became the sharing of content, feelings, and personal details online.

Sharing once meant giving up part of what you had so that someone else could have it. Today, people share on social media in order to construct a parallel identity. The question remains whether, in this process, part of the self is also lost.
As Sherry Turkle observed in the early 2010s, the Cartesian *dubito, ergo cogito, ergo sum* has become "I share, therefore I am." Is this digital existence enough? Identity is now shaped by self-presentation, idealized models, social comparison, and the constant presence of an audience, creating a condition in which authenticity and performance can no longer be fully separated. Guy Debord had already described a related condition in 1967 in The *Society of the Spectacle*, where he argued that everything once directly lived has receded into representation.

What is the true purpose of this act? The piece does not attempt to answer the question directly. Instead, it holds space for uncertainty.

Aesthetic

The creative process begins strictly from the body, not from a written text. Through improvisation, choreography, and technological experimentation with cameras and projections, the work develops a physical vocabulary of its own. The performer draws on her background in classical dance, contemporary dance, and performance, combining these influences with everyday gestures to create a language that is both abstract and grounded, yet emotionally

legible to the audience. This language allows viewers to recognize themselves in gestures drawn from daily life, capturing the doubt and honesty within a narrative that exposes intimate thoughts. The body remains the primary instrument of storytelling, accompanied by the camera, which highlights micro-movements otherwise invisible on stage, frames specific areas of the body, and separates the live performer from her projected image, creating distinct atmospheres and raising the question of which bodily narrative the viewer chooses to follow.

This process also explores multiple perspectives on the movement, using a macro lens to capture small physical details and revealing the performer's shifting expressions through moments of fracture and tension. The work pushes physical exposure, self-revision, and the deliberate selection of what one chooses to reveal to the audience to an extreme, allowing the hidden process behind this presentation to become visible.

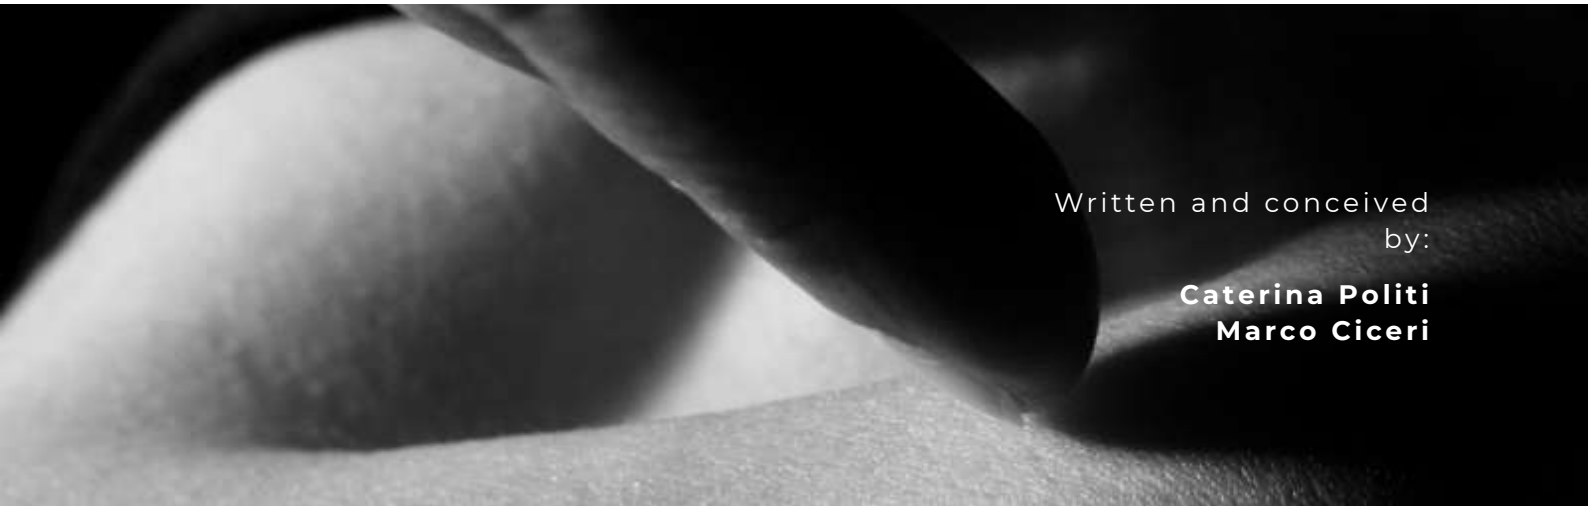

Lighting and visuals, as co-protagonists of the performance, create an atmosphere that oscillates between warm intimacy and loud, at times chaotic display. They interact with the performer by sometimes supporting her, and at other times generating contrast and disorientation. The space shifts from moments that feel small and welcoming, like a warm room in which the performer feels calm and safe, to moments in which it expands and becomes austere and clinical, producing an unsettling sense of distance. The visuals open a window into the room through which the audience gains access to a voyeuristic, filtered version of what is unfolding on stage.

The soundtrack of *Overshare* emerges from a collaboration with Martina Bertoni. Her sensitivity for fragile, unstable atmospheres feels especially suited to this piece: she knows how to hold a room in near-silence, then let it fracture into sound, moving between near-whisper and overwhelming volume. This same instinct, knowing when to withdraw and when to let sound take over, mirrors the piece's own oscillation between private and public.

Conclusion

In live experience, inhibition prevails: every glance, pause, and reaction introduces hesitation. Was that too much? Is this the right context? Online, that immediate feedback disappears, and the audience becomes vast and constant. The digital self is shaped with increasing audacity, split between a public persona and a private core, sustained by the idea that others may be imagining a different version of who we are. Who am I? Is it all performance, or is it something more? Is it possible to become whole again? And finally, which one is real?

Perhaps neither, or perhaps only the body when it stops curating itself and begins to tremble. On stage, nothing can be edited: a body is a body, and what it feels cannot be filtered, only inhabited. The fragility shown live does not seek approval; it seeks only to exist in the presence of another gaze, for a moment, without a screen in between. *Overshare* suggests that a vulnerable form of connection may still be possible, or perhaps that it is already present whenever we stop hiding.

Caterina Politi
Marco Ciceri

OVERSHARE

TEAM

Marco Ciceri

Co-director / Visual artist / Performer

Marco is a Berlin-based Italian media artist specializing in immersive audio-visual installations and performances. He studied design and art at the Free University of Bozen/Bolzano, where his thesis explored the contrast between live and mediated reality.

After collaborating with Marshmallow Laser Feast in 2014, he joined Berlin's Pfadfinderei studio in 2015, creating visuals for renowned venues and festivals.
Ciceri has a long-standing partnership with musician Grand River, producing audio-video shows that merge light, music, and visuals, showcased at venues like Milan's Triennale Museum and London's Barbican Center.
He has also worked independently, contributing installations to festivals such as Terraforma and Mutek. Since 2020, he has collaborated with Alessandro Cortini, developing visual content for live performances, including "Nati Infiniti," which premiered at Berlin Atonal in 2023.
Known for its "flowing esthetic," Ciceri integrates generative software and motorised mechanics to create dynamic, detailed animations.

Martina Bertoni

Musician

Martina Bertoni is a Berlin-based composer, experimental cellist and educator, whose work "dissolves the boundaries between emotion and architecture" (A Closer Listen), crafting soundscapes where control and resonance become fluid entities. Her practice interrogates sound's capacity to reshape perception through electroacoustic composition, generative systems, drone minimalism, and destabilised tunings, often employing timelessness as a compositional framework.
Her research lies at the intersection of embodied sound practices and post-instrumental identities, an exploration central to her most recent album Electroacoustic Works for Halldorophone (Karlrecords, 2025). This work expands a discography that lists All The Ghosts Are Gone (Falk, 2019), Music for Empty Flats (Karlrecords, 2021), Hypnagogia (2023), a study in "haunted minimalism" (Boomkat).
Beyond her artistic practice, Martina's cello and original works have been featured in numerous soundtracks for films, series, and documentaries. She is currently a Lecturer at the Department of Music at Catalyst Institute for Creative Arts and Technology in Berlin.

Marco Di Nardo

Production

Marco Di Nardo started his journey in dance in the breaking scene in 2002. in 2014, marco co-founded the berlin-based frantics dance company, where he continues to serve as an artistic director and choreographer, leading collaborations with orsolina 28, of curious nature, staatstheater osnabrück, and co-creating the freiart festival. since 2017, he has collaborated with wang ramirez as an assistant choreographer and former dancer in productions such as we are monchichi, you.me, au revoir for göteborgsoperans danskompani, and l'après-midi d'un faune for opera du capitole de toulouse. he is currently working on their new production, a l'origine. previously, he worked as an assistant choreographer at braunschweig staatstheater and as a dancer for panorama dance company, theater strahl, and southpaw dance company. marco has taught at renowned institutions such as opera bastille paris, ballet preljocaj, staatstheater kassel, staatstheater braunschweig, l'opéra national du capitole toulouse, northern school of contemporary dance, of curious nature, göteborgsoperans danskompani, and b12 berlin. in his workshops and classes, he focuses on merging the dynamic elements of urban and contemporary dance while incorporating a theatrical approach to bring depth and narrative to movement.

Henning Lindow

Set designer

Henning Lindow is a product designer working at the intersection of engineering precision and open access. He studied product design in Bozen and Weimar, and today works for Bombardier, developing mechanical solutions for tight spaces aboard aircraft. Alongside this, he is building an open source design system that allows furniture to be customized and self-produced, extending design decisions beyond the studio and into the hands of whoever needs them. For Overshare, Lindow designs the set: a table and a series of small stands built to hold the live cameras, translating his work on constrained, functional space into the architecture of the stage.

Marcello De Francesco

Artistic consultant/ Drammaturgical support

Marcello De Francesco studied Philosophy at La Sapienza University of Rome, a foundation that continues to inform his work across performance, teaching, and writing. He was a member of the dance company Two in One, under the direction of Ilenja Rossi, and later joined the faculty of the Urban Dance Academy in Rome as a resident teacher. His critical writing has appeared in the philosophy journal Tempi Contemporanei, and he has written three short films: "Nell'Arena dei Ricordi", "11e42", and "Qui non c'è acqua".

Written and conceived by:
Caterina Politi
Marco Ciceri

OVERSHARE

TECHNICAL RIDER

DURATION OF THE PERFORMANCE: APPROXIMATELY 50 MINUTES

2 PERFORMERS (1 DANCER, 1 VISUAL ARTIST)

Contact:

- Marco Ciceri +49152237166571 marco.ttt@gmail.com(Co-director/Visual artist/Performer)
- Caterina Politi +39 3319916300 caterinapoliti140494@gmail.com (Co-director/Choreography/ Dancer)

The hosting venue must provide a detailed technical sheet, including stage and rigging specifications, list of draperies, lighting equipment list, sound equipment list, technical contacts, etc., together with stage and auditorium plans including seating, preferably at 1:50 scale (top view and cross-section), as well as a PDF or DWG file if available.

A detailed technical schedule for the set-up, a stage plan, and a lighting plot specific to the performance will be sent at least one month prior to the load-in.

SPECIFICATIONS TECHNIQUES

STAGE

Stage specifications
· Black box: dimension 10x10m (ideal) or 8x8m (minimum)
· Grid: minimum height 4,7m
· Black dance floor: 10x10m or 8x8 (minimum)
· Stage in black: either covered with black dance floor or painted black
-IMPORTANT NOTE: THE SHOW NEEDS TO BE RUN IN PITCH BLACK LIGHT CONDITION Please confirm blackout capability of the space (blinds, curtains, or covered windows)

VIDEO

- 1 x Screen: 16:9 ratio. The screen surface must be in good condition. If no screen is available a white clean wall can be used as long as framed by black curtains.
- 1 x Projector: the projector has to be at least 7000 ANSI lumen or 10000 ANSI lumen (ideal) with a minimum resolution of 1920X1080. The bulb of the projector has to be in a perfect state
- Lens throw must be sufficient to cover entirety of projection area
- Projectors to be flown from rig and positioned to avoid extreme keystoning - show content is cinematic and of humans so image must not be distorted or overly lens corrected
- 1 x HDMI cable coming to the stage table
- 4 x HDMI cables of 15 m each
- 1x HDMI cable: from ceiling rig point (center stage) to onstage table
- 3 x Free high-quality European power strips with 6 plugs each without on-off power switches. If in a different region, adapters for the power strips must be provided. No single adapters but provide EU power strips
- Anchor point to rig a camera on the ceiling of the stage in a centered position
- 1 x table 1x2 m at a height of 80 cm, on stage
- IMPORTANT NOTE: THE TABLE IS NOT TO BE SHARED WITH OTHER ARTISTS. POWER MUST BE MAINTAINED TO THE SET UP AT ALL TIMES BETWEEN REHEARSAL AND PERFORMANCE
- 1 x chair, black, not foldable (tbc based on what is available on site), on stage

LIGHTING and FIXTURES

- 4 x Theater Spot Alogen 1000W Fresnel
- 1x 50 x 3kW dimmer circuits
- 1 x Fog machine - Viper minimum 1300W
- 1 x Hazer
- 4 x Moving head, possibly Robe MegaPointe or similar class
- 4 x RGB light panel
- 4 x RGB profilers with narrow lens
- 2 x Strobe
- 2 x 2m truss stand, black or cleanly covered with molton
- Color filters gels TBC
- All the lights must be on one universe
- A 3pins DMX cable must arrive at the stage table

Technician Requirement

A professional lighting technician provided by the venue (house tech) is required to assist with setup. This setup typically requires a minimum of 5 hours. And the dismantling after each show requires 20 minutes.

The show will be operated live on stage by Marco Ciceri, running cues from his own laptop simultaneously with the visual and music.

SOUND

- The PA should be adequate for the size and capacity of the venue
- 4 stage monitors on the floor (2 upstage, 2 downstage), Stereo patch: stage left front + upstage / stage right front + upstage.
- Digital console with patch allowing separate control of front-of-house levels.
- XLR audio cable from the stage laptop to the front-of-house console
- XLR to 3.5mm mini-jack adapter
- Intercom between stage, lighting, and sound control

Technician Requirement

A professional sound technician provided by the venue (house tech) is required to assist with setup and soundcheck. This setup typically requires a minimum of 2 hours.

The show will be operated live on stage by Marco Ciceri running cues from his own laptop simultaneously with the visual and music.

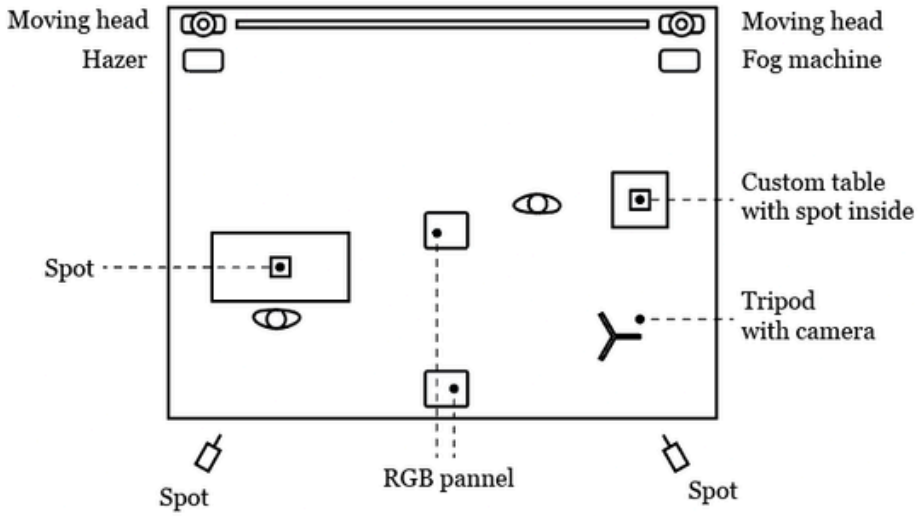

SET/COSTUMES

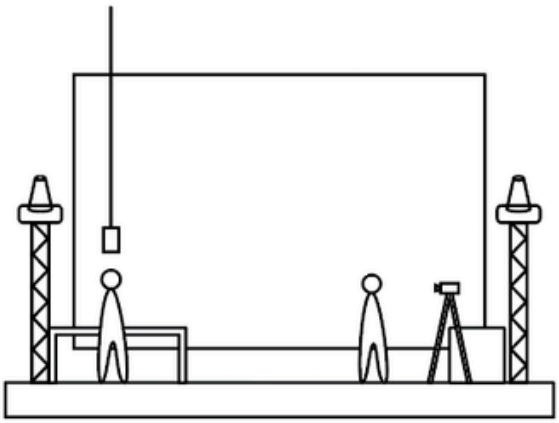

- Company luggage for costumes: 1 travel bag, 90 x 40 x 30 cm, 23 kg
- Company luggage for equipment: 1 travel bag, 90 x 40 x 30 cm, 23 kg (including tripod, camera equipment, filters, etc.)
- 1 custom table, provided by the company
- 1 foldable cube

SPECIFICATION OF SET

- One table on stage (provided by the venue)
- One chair on stage (provided by the venue)
- One custom table, 80 x 80 x 80 cm, made of metal and plexiglass, fireproof
- One cube, made of metal and plexiglass, fireproof
- Three cameras with tripods
- One camera rigged on the ceiling above the stage

LIGHT PLOT(DRAFT)

DRESSING ROOMS & CATERING

- 1 Dressing room with shower and restroom facilities, including towels
- internet/Wi-Fi access.
- Please provide: still water in bottles, coca cola , fresh fruit, nuts, cereal and chocolate bars, fruit juice, coffee, tea, vegan milk
- kettle
- The promoter should provide Breakfast, Lunch and Dinner for the entire touring party while they are on site. This includes dinner on the night of arrival and breakfast on the morning of departure where applicable.
